Discover **RHoMIS**

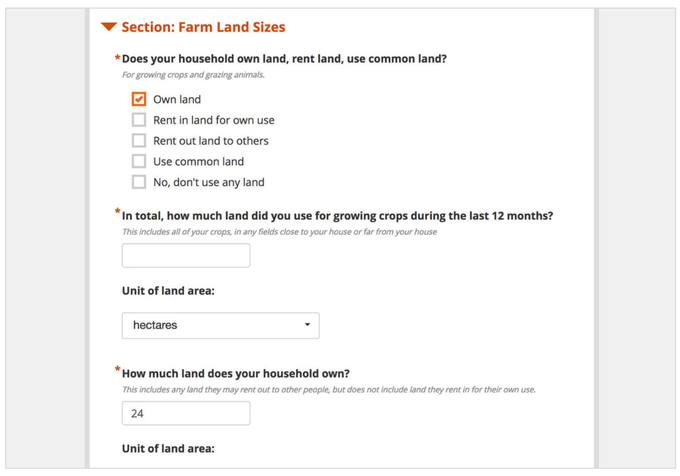
ILRI
INTERNATIONAL LIVESTOCK RESEARCH INSTITUTE

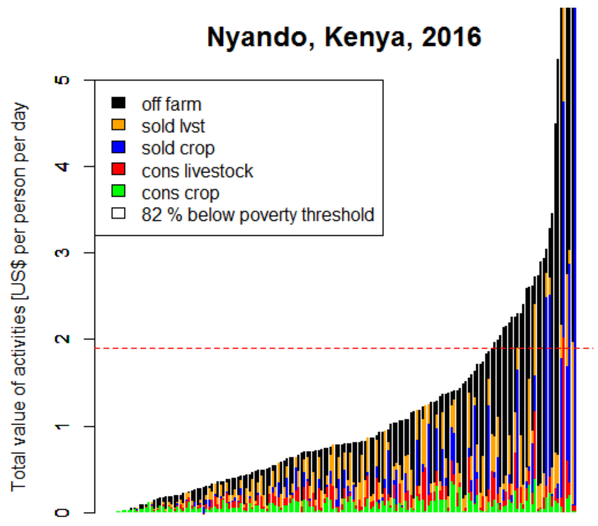
A standardised and flexible tool to monitor livelihoods, farm management and food security

A user-friendly questionnaire, carefully designed and refined through many uses. Well known indicators used, with many optional modules available.

Digital infrastructure for data collection, direct upload to web-database, and real-time visualisation.

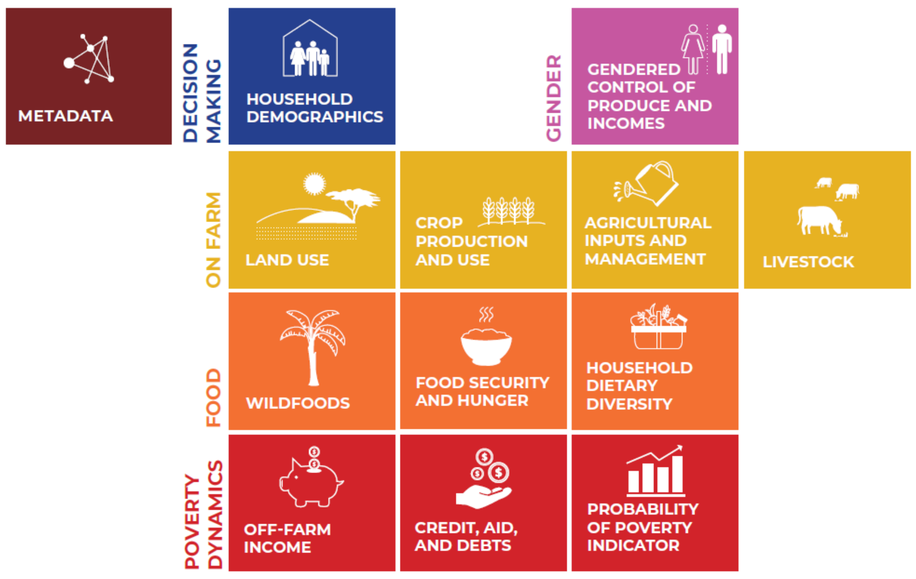
Data processing and analysis code, coupled to the standard questions and modules of the survey.





More than 28,000 farmers interviewed in 31 countries

Core Modules



Optional Modules

Invitation to new users: RHoMIS provides an implementation-ready, efficient solution for site characterisation. The data is suitable for impact assessments, targeting of interventions, and multi-site comparisons.

RHoMIS is available for use by your project. We welcome new members to the community of practice, and hope that data will be shared to leverage greater analytical power and tackle some of the big questions in rural development.
